This site is dedicated to top notch 3d fish screensavers from Formosoft. I am a huge fan of all their screensavers so I thought I would put together this little fan site to spread the joy. Some of these screensavers are aquarium related and others are ocean related, but all are underwater and have fish in them! They are all very high quality and you will not find any junk or filler content on this site.

Some of the screensavers have demos available which I hope you will enjoy. If you find that you want to purchase a full version, please come back here to buy it to support my site. It does cost money to run this site and I get a small commission when you buy a screensaver from here. I appreciate your help in keeping this site up and running! Enjoy :)

## SN I HPLD

By far the best dolphin screensaver I have ever seen, this incredible dolphin screensaver is set in the deep blue ocean where dolphins roam free. Watch as pods of dolphins cruise through their element, happy as can be.

It is truly a pleasure to watch this screensaver as the camera follows the dolphins at different angles, always keeping it interesting.

The screensaver comes with four different species of dolphins as well as a bunch of deep sea fish to keep them company.

## REVASNEERCS HS I FNOLC

If you love clownfish then this is the perfect match for you! This 3d fish screensaver features a full 15 anemonefish! Finding Nemo couldn't be easier with this on your desktop!

This stunning screensaver features an amazing coral reef background with 3d anemones swaying in the water. Watch as the anemonefish interact with the anemones in this ultra realistic screensaver. You won't believe your eyes.

see to believe!

This is a brand new addition to the rapidly growing line of digifish screensavers and it is every bit as good as the others. It uses cutting edge technology and it shows. Must
